April 3, 2020

Parents, Students, Staff and Community Members:

Today it was announced by Governor Lujan-Grisham that her team has selected Hiroshi Miyamura High School (HMHS) as an additional hospital in our area. We are working with respective Federal and State agencies to facilitate the use of this facility. These are challenging times and we will continue to do everything that we can to serve our community.

All food services for students that were taking place at HMHS will be now served out of J.F.K. Middle School starting on Monday, April 6, 2020. This change has been made to assure that children who were receiving food at HMHS will not see any disruption in these services. Administrative Services for HMHS and distance learning will continue from J.F.K. Middle School as well. We will not allow this change to interrupt the services to our students.

We urge our community to continue to follow all safety precautions that have been set by our local and federal governments. Together we will make it through these changing and trying times.

We are so thankful for the support we continue to receive from our community.

Respectfully,

Mike Hyatt, Superintendent
